Nikolay Vaklinov

Software Engineer at Surreal Technology
London, United Kingdom

Summary

"After discovering my passion for web development, I couldn't get
enough. I made websites for friends and family, interned with a
local business. I'm looking forward to bringing that passion to a full-
time role. Without doubt England and London respectively offer
the best conditions for studying and work in the sphere of Fintech
which combine the two area of highest interest for me. London is
the biggest tech hub and the possible opportunities for programming
skills would be enormous."

___

Experience

Surreal Technology
Software Engineer
December 2018 - Present
London, United Kingdom

Subbit
Technical Coordinator
April 2018 - Present
London, United Kingdom

SUBBIT is an ambitious FinTech company providing new payment alternative
which allows consumers to pay for just anything on a monthly subscription
basis rather than cash or cards.
SUBBIT is powered by smart mobile technology and enables any business to
convert virtually any product or service into a subscription package.

Coventry University
Student Ambassador
April 2017 - July 2019 (2 years 4 months)

As an ambassador for Imperial Coventry University, my fundamental role is to
help prospective students learn more about the university and its programs.
Other responsibilities:
Assistance at recruitment events (including on-campus and online information
sessions and London-based fairs).

Participation in student panels at information sessions (involving public speaking).

Individually contacting prospective students via email and/or social media.

Contribution to our social media activities.

Being a student blogger for the Coventry University website.

Education

City, University of London
Master's degree, Computer Science · (2018 - 2019)

Coventry University
Bachelor's Degree, International Finance and Accounting · (2015 - 2018)
